

drop 06

- standard 3040
- velvet corduroy 3012
- glimmer 3006
- nook 3906

A collection inspired by the performance materials of uniforms worn by heroes, both imagined and real.

Left : Armor [ca. 1525 and later]
Helmet, pauldrons, and vambraces attributed to Kolman Helmschmid German

Right : Armor [ca. 1400–1450 and later]
Italian

extra-ordinary.

Introducing Standard, Velvet Corduroy, Glimmer and Nook.

alcohol treatable
hydrogen peroxide treatable
quaternary ammonium treatable
stain resistant
ink resistant

NO

PVC
PFAS
DMF
phthalates
heavy metals
antimicrobials
flame retardants
formaldehyde

**standard:
anything but.**

The touch of a fine, wool suit.

Standard's geometric pattern can play the lead role...

or a supporting role - it's up to you.

**performance with
less chemistry?**

yes, please.

No topical finishes, thanks engineered yarns!

Nothing shallow about performance at the fiber level.

Poly and acrylic fibers are specially engineered to be super smooth.

A smoother surface keeps dirt and stains off. Easier to clean too!

Topical finishes can do this but on a superficial level.

velvet corduroy:
high pile,
high performance.

This plush to-the-touch performer is on-trend and tough.

Velvet Corduroy pairs a high pile profile with high performance for a luxe new look that will stay that way.

**bleach treatable,
you know it.**

Easy to clean!

Finish-free!

Prop 65 compliant!

High abrasion!

Luxurious hand, what's not to love?

**glimmer:
glow on.**

Glimmer has the subtle, metallic glow of raw silk but here's the thing: it's decked out in a tough topcoat that stands up to whatever comes its way.

Glimmer's silicone finish is the sustainable, cost-effective textile topper that elevates the value of this elegant go-with performer.

not just another
pretty face.

nook:
hello, hybrid.

Ready for anything,
Nook comes dressed in
a silicone topcoat.

Nook's silicone topper is an affordable, sustainable solution that allows soft-looking fabrics to play hard.

**can one fabric
have it all?**

oh yes.
